

Gauss Meter

Including Transverse Probe

Data Sheet No 701

Product Data:-

Preface:

The Eclipse digital Gauss meter can be used to assess the strength of existing magnetic separation equipment either pre or post audit.

This unit has many beneficial features and is supplied complete ready to use with a transverse probe and fully calibrated. Supplied in a robust carry case the meter can be used in the most arduous of environments.

Specification:

+/- 2% or 10 Gauss (whichever is the greater)
Units, Gauss, Tesla, Ampere Metes or Oersted
Operating temperature 0°C to +50°C
20 hours battery life, continual use
LCD Display, 16 characters
Weight 0.42 kgs
Size 195mm x 101mm x 44mm

Standard Items:

Gauss Meter
Hall effect transverse probe
Impact resistant storage case
Instruction manual
Battery

Additional Items:

Special probe, manufactured on application
External power supply
RS232 communication lead
Zero flux chamber
